ATEM Mini Pro-Why It Is A Great Buy

Getting online and streaming is easier than ever when you have the right tools. The Blackmagic Design ATEM Mini Pro makes an all-in-one solution that works well. Easy to use and to train volunteers on. Once the ATEM Mini Pro is setup you do not need a computer to run it. The ATEM Mini Pro is 3 devices in 1. Switcher, Record Deck, & Hardware encoder. Currently priced at \$595 at most retailers. The gear is solid. **Note do not but the ATEM Mini It is another model that has less features.**

Pros:

- Easy to use
- Multiview
- Switcher, Records (w/hard drive), & Streams (Wired)
- USB can be used as a web cam if you are not recording on a hard drive
- Stand Alone Switcher, Record Deck, & Hardware Encoder

Cons:

- No Wi-Fi
- No Second HDMI output (you can switch from Multiview to program out)
- Does not have an auxiliary output
- May not be great if you are doing IMAG (Image on Screen)
