# DataVideo NVS-33

Having the right tools to broadcast makes broadcasting easy. The NVS-33 is a great addition to any streaming setup. Easy to use, Quick to start broadcasting, & provides great quality. The retail on this is \$699 but well worth it. Works great with switchers from Blackmagic Design & DataVideo. Nice clean web interface. This is a record deck & hardware encoder. Hardware encoder means it does not need a pc to run once this setup. I would also suggest getting the rack mount kit as well.

## Pros:

- Easy to use – Easy to train people
- SDI & HDMI Inputs
- Audio can be set up using the HDMI / SDI as embedded
- Analog Audio in (RCA)
- Record Deck – Records to SD Cards
- Stream Deck
- Can be Rack Mounted with optional rack

## Cons:

- No Wi-Fi
- Only Sends 1 stream
