

# LiveU Solo Encoder With Paul On Call

sermon.net

# LiveU Solo Encoder

It is worth having a single encoder that is portable and can have the ability to stream reliably. The LiveU is a dedicated hardware encoder (no computer is needed once setup). This is great for streaming a different place that the local internet is not great. The LiveU is more of the high end encoder but works great. You can purchase the LiveU monthly service for around \$300 per month. This includes the 2 LTE (Cell) Service for bonding(linking)

The LiveU comes in HDMI & HDMI & SDI. I would suggest getting the SDI version since it has the 2 sources.

If you don't want to use LTE Service the bonded is till able to do for \$40 a month. Link your local internet and another connection.

With the LiveU you can use up to 4 connections 2 LTE, 1 Wifi, & 1 Ethernet.

Great for mobile churches.
