What live encoding software are you using? Standard (vMix, OBS, Wirecast, etc)

PLEASE NOTE:  
If you are multi-bit rate streaming, within your encoder always arrange the streams from highest to lowest (with the highest bit rate on top).

Please select your Stream Params - up to 3 Streams can be delivered: Audio only live stream

Video bitrate: 1500 kbit/s Video Dimension: 1280x720 Audio bitrate: 96 kbit/s

Add stream Save Broadcast Settings

Server: rtmp://stream.sermon.net:80/

Stream name 1: \_vb1500\_ab96\_fps1280x720?key=59574d1c&rec=disk

Email Stream Credentials to: info@pwoodtech.com

Copy Link

Copy Link

Send

Video bit rate will need to be set from anything ranging from 2-3.5mb This is just a suggestion. Set to what you need.

Encode size(resolution)

SD 640x480 4x3 square

SD 640x360 16x9 widescreen

-----  
HD 1280x720 16x9 widescreen

HD 1920x1080 16x9 widescreen

## LiveU Solo Tips

- If you are having trouble, please restart the LiveU
- To Start or Stop the streaming – Give the box power
- If the stream breaks into several files. This means your stream will be dropping and you are overloading your internet connection. You will need to lower the bit rate some.
- If you are not getting a signal to sermon.net double check that the server/url has // after the credential.
- Also to limit your bitrate. What you send us is what we send out.
